List of Programs

1. Write a Python program to print the Fibonacci series up to **n terms** using a **dynamic programming approach**.
2. Write a Python program to **find the shortest path from a source to a destination in a multi-stage graph using dynamic programming**.
3. Write a Python program to **find the shortest distances between every pair of vertices in a graph using the Floyd–Warshall algorithm (dynamic programming approach)**.
4. Write a Python program to **find the shortest paths from a single source vertex to all other vertices in a weighted graph using the Bellman–Ford algorithm**.
5. Write a Python program to **determine the maximum value that can be obtained without exceeding the capacity, given the weights and values of items (0/1 Knapsack Problem)**.
6. Write a Python program to **find the minimum cost tour that visits every city exactly once and returns to the starting city (Travelling Salesperson Problem)**.
7. Write a Python program to **solve the Sum of Subsets problem using a backtracking approach**.
8. Write a Python program to **solve the Assignment Problem using the Branch and Bound approach**.
9. Write a Python program to **find the BFS (Breadth-First Search) traversal for a given graph**.
10. Write a Python program to **find the DFS (Depth-First Search) traversal for a given graph**.
